This month, the Membership will vote on continuing to show contract and percentage results on the Bridgemates. It should be noted that this information is restricted at bridge tournaments and most local clubs. Please review the propositions below and be prepared to vote "Agree" or "Disagree".

PROPOSAL 1:

Do not show the interim percentage on the Bridgemate once the result is accepted.
***Rationale for proposed change*:** The percentage displayed is inaccurate until the hand has been played by all tables. Discussion of the percentage slows the game. Most local clubs do not show the percentage results.

PROPOSAL 2:

Do not show the results of other bids and the play results for a given hand on the Bridgemate once the result is accepted.
***Rationale for proposed change*:** Currently, the club displays these results for most games. There often is discussion about what other tables played and which bids made/did not make. This discussion slows the game. Importantly, other players can overhear the results when they are communicated orally. This can give following tables an edge in playing the same board(s).

The vote will take place at the Thursday, November 19th Annual Meeting at 11:30. Early voting will be available starting Thursday, November 12th.
